

# What to expect from your EMS supplier

HVM Graphene 2013 Conference  
5 November 2013 Cambridge  
[www.hvm-uk.com](http://www.hvm-uk.com)

# Electronics manufacturing service – saving you time to market

Yes, I'm biased!

**But, seriously...**

**What you want  
is an easy way  
to turn your  
idea into  
reality**

**Big or small, complex or simple**

# Ideas turned to reality

Data logger –  
monitors in-circuit IECM long  
before and after encapsulation

# An EMS lets you get on with what you're good at

Having ideas

Seeing the potential

Proof of concept

Designing the product

*But getting it made? Hmm*

**An EMS  
does this  
(and a lot  
more)**

**Helps you to  
design for  
manufacture**

**Component  
sourcing and  
purchase**

**Sub-  
and final  
assembly**

**Ships  
products  
worldwide**

**Low to  
high  
volumes**

**Field trial  
quantities +  
product  
changes**

**Testing  
throughout  
production**

**A  
GOOD  
EMS will  
provide**

Prototype  
manufacture

Test  
development

NPI and  
DfM advice

Pre-  
production  
modifications

Specialist  
skills –  
medical,  
aerospace

On-going  
flexible  
production

# As you trudge round potential EMSS, look for

History of being there, done that  
equipment facilities

# Any questions?

## Briton EMS Limited
